Experience

Associate Software Engineer **Oct 2025 – Present**
ISchoolConnect *Noida, UP*

- Architected a multi-tenant **Java/Spring Boot** ETL service extracting records across Slate and Salesforce CRMs, normalizing heterogeneous payloads through a strategy-pattern factory built on object-oriented open/closed design principles.
- Engineered an end-to-end full-stack **GPA evaluation platform** (**Next.js BFF**, **NestJS**, **Slate CRM**), deployed across **4+** enterprise university clients and generating **$150K+** in commercial contract value per client.
- Reduced document-analytics API response time **3×** (**15s to 5s**) by profiling and restructuring **PostgreSQL** query execution and data-access patterns to eliminate redundant database round-trips across the service layer.
- Engineered **NestJS** middleware routing bidirectional streams over **WebSocket** with per-session isolation and codec conversion, sustaining **1k+** concurrent sessions at **100ms** p95 latency under production traffic.
- Automated extraction and transformation of **50K+** student application records from **PostgreSQL** through scheduled **Python** pipelines, cutting manual reporting effort **60%** for internal stakeholders.
- Rolled out **Sentry** observability across test and production services with structured error capture, custom alert thresholds, and **DLQ** redrive monitoring, measurably reducing mean-time-to-detect for critical incidents.

Software Engineer Intern **Apr 2025 – Sep 2025**
ISchoolConnect *Noida, UP*

- Launched a full-stack AI interview platform that automated **200+** monthly candidate interviews and cut administrative turnaround **50%**, replacing a manual scheduling and evaluation workflow for hiring stakeholders.
- Delivered a zero-downtime CDN migration through a **Jenkins CI/CD** pipeline in an **Agile/Scrum** team, reducing Largest Contentful Paint **25%** and stabilizing release deployments across environments.

Education

Bhagwan Parshuram Institute of Technology **Dec 2021 – Jun 2025**
B.Tech, Electronics & Communication Engineering *GPA: 7.9/10.0*

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

Projects

Fluxpay | *Java, Spring Boot, Spring Security, PostgreSQL, Kafka, Redis, Docker* github.com/Yash-Gupta-01

- Developed a microservice payments platform in **Java (Spring Boot)** secured with **Spring Security** and **JWT**, sustaining **1,200 TPS** in simulation at p95 latency under **120ms** via authored Artillery load tests.
- Modeled a normalized **PostgreSQL** schema with idempotency-aware transaction procedures over a **Kafka** event pipeline, guaranteeing zero double-charges across **500+** concurrent simulated users under sustained load.

AI Interviewer | *NestJS, MongoDB, Next.js, TypeScript, REST APIs, OAuth* github.com/Yash-Gupta-01

- Structured **MongoDB (NoSQL)** schemas for resumes, question banks, and transcripts behind RESTful **NestJS** endpoints with OAuth-secured role-based access, unit-tested with **Jest** across scheduling and analytics modules.

Technical Skills

- **Languages:** Java, TypeScript, JavaScript, Python, Go, C++, SQL
- **Distributed Systems & Backend:** Spring Boot, Node.js, NestJS, Express.js, Kafka, WebSocket, REST APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB (NoSQL), Redis, Prisma ORM
- **Testing & Quality:** Unit & Integration Testing (Jest, Mocha), Performance Testing (Artillery), Code Review
- **Cloud & DevOps:** Docker, AWS, GCP, Jenkins, CI/CD, Git, Sentry, Kubernetes (familiar), Linux (Ubuntu)
- **Fundamentals & Practices:** Data Structures & Algorithms, OOP & Design Patterns, Event-Driven Design, Agile/Scrum
- **Frontend:** React.js, Next.js, Redux, Angular 14, Tailwind CSS

Achievements

- Won **First Place** at the ISchoolConnect hackathon (**Rs. 50,000**) for an AI-powered interview platform; also **First Position** in HackBPIT (HashDefine, BPIT) and **First Runner-Up** in CodeGeeks Hackathon (DTU, 2023).
- Solved **450+** algorithmic problems across LeetCode, GeeksforGeeks, Codeforces, and CodeChef.
