Experience

Associate Software Engineer Oct 2025 – Present
ISchoolConnect *Noida, India*

- Built a decoupled **Go** pipeline on **Google Cloud** (Cloud Run, Pub/Sub, Scheduler) syncing **10K+** delta records every 15 minutes into MongoDB via atomic lease fencing, with zero data loss across restarts and rate limits.
- Engineered **NestJS** (**TypeScript**) middleware streaming bidirectional audio over **WebSocket** with codec transcoding and per-session isolation, sustaining **1,000+** concurrent sessions at sub-100ms p95 latency.
- Architected a multi-tenant **Java**/Spring Boot ETL service across Slate and Salesforce CRMs using a strategy-pattern factory, with **Kafka** retry, DLQ, Sentry alerting, and operator redrive to guarantee zero silent message loss.
- Reduced document-analytics API response time **3**× (15s to 5s) by profiling and restructuring **SQL** query execution and data-access patterns, eliminating redundant database round-trips.
- Automated extraction and transformation of **50K+** student application records from PostgreSQL through scheduled **Python** pipelines, cutting manual reporting effort **60%** for internal stakeholders.
- Developed responsive, accessible (**WCAG**) **React** and Next.js interfaces for GPA and Transfer Credit evaluation with reusable components and live recalculation, cutting counsellor effort by **80%**.
- Shipped a **Next.js** and Stripe credit-billing flow with webhooks and server-side BFF proxies, achieving **100%** payment reconciliation without exposing client-side credentials.
- Resolved a midnight production incident caused by a CRM staging–production schema mismatch within **2 hours**, then designed a systematic long-term fix to prevent recurrence.

Software Engineer Intern Apr 2025 – Sep 2025
ISchoolConnect *Noida, India*

- Launched a full-stack AI interview platform (**NestJS**, Next.js, MongoDB) that automated **200+** monthly interviews and cut administrative turnaround **50%** for hiring stakeholders.
- Delivered a zero-downtime CDN migration through a **Jenkins** CI/CD pipeline on a production **Angular 14** platform, reducing Largest Contentful Paint by **25%** for a global user base.

Education

Guru Gobind Singh Indraprastha University Dec 2021 – Jun 2025
B.Tech, Electronics & Communication Engineering *New Delhi, India*

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Projects

Fluxpay | *Go, React, Redux, PostgreSQL, Kafka, Redis* github.com/Yash-Gupta-01/-Fluxpay

- Developed a payments microservice in **Go** (goroutines and channels) with a React/Redux dashboard, sustaining **1,200 TPS** (simulated) at p95 latency under **120ms**; authored and published Artillery load tests.
- Implemented idempotent transactions using Redis distributed locks, a Kafka transactional outbox, and a PostgreSQL ACID ledger, ensuring zero double-charges across **500+** concurrent simulated users.

AI Architect Assistant (personal) | *Next.js, TypeScript, Gemini* github.com/Yash-Gupta-01/AI-Architect-Assistant

- Created a full-stack **Next.js** application with API routes that uses Google Gemini for a guided requirement-gathering dialogue and generates floor-plan images from the captured design constraints.

Technical Skills

Languages: Go, Java, Python, TypeScript, JavaScript, C++, SQL
Front-End: HTML5, CSS3, React.js, Next.js, Angular 14, Redux, Tailwind CSS, Accessibility (WCAG)
Back-End: Spring Boot, Node.js, NestJS, Express.js, REST APIs, Microservices, Kafka, WebSocket
Databases: PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps: Google Cloud (Cloud Run, Pub/Sub), AWS, Docker, Jenkins CI/CD, Git, Sentry, Kubernetes (familiar)
Practices: Data Structures & Algorithms, OOP, Design Patterns, Code Review, Documentation, Debugging, Jest, JUnit

Achievements

- Won First Place at the ISchoolConnect AI Hackathon (30+ teams) for an AI interview platform, earning Rs. 50,000.
- Secured First Position in HackBPIT and First Runner-Up in the CodeGeeks Hackathon (DTU, 2023).
- Solved **450+** DSA problems across LeetCode, GeeksforGeeks, Codeforces, and CodeChef.
